Earn a quick £8 by making 2 phone calls!

£8 to place 2 calls.
(2 calls necessary!)
Deadline: within 2 days

CHECKLIST

These tips will prepare you for your calls

Record only one call per domain. Remember, the scenarios provided are meant to inspire, not to be read as a script

Ensure each call duration falls within the 4 to 5-minute range. Recording time begins upon connection after pressing 12345 (Step 5). Remember, all one-way conversations should be conducted in English.

During the 4-minute call, choose from 5 scenarios per domain (topic). Record one scenario or smoothly switch to the next if needed, ensuring a natural transition without restarting

Review the scenarios outlined in the calls table. Note the domain number indicated above each call table, which ranges between 1 and 2.

Microphone types are specified above each call table in your email handoff. Remember not to share any personal information. Ensure that all details provided during the call are entirely fictional.
